

1. Proposed Topic/Idea Name

Portal for Academia-Industry Collaboration for Skill Mapping, Internships and Placement

2. Research Area Category

- ☐ DD01: Data Science and Data Analytics
- ☐ DD02: Next Gen Programming System
- ☐ DD03: Cyber Security and Computer Networks
- ☒ **DD04: Software Engineering and Web Technologies**
- ☐ DD05: Artificial Intelligence and Machine Learning

3. Nature of Project/Research Work

- ☒ **Application**
- ☐ Business Model
- ☐ Product
- ☐ Research
- ☐ Review
- ☐ Technology Upgradation

4. Source of the Topic

Identified through observation of the existing academia-industry engagement process, which is largely fragmented and manual, often resulting in a mismatch between students' skill profiles and the skill requirements sought by industry for internships and placements.

5. Brief Description of the Project

Academic institutions and industries often lack a structured channel to align student skills with industry needs, leading to inefficient internship and placement processes. This project proposes a web-based portal that maps student skills against industry-defined role requirements and streamlines internship and placement coordination between academia and industry, improving employability outcomes.

6. Project/Research Outcome (At least 3)

- A centralized portal enabling academic institutions and industry partners to register, connect, and interact
- A skill-mapping module aligning student skill profiles with industry-defined role requirements
- An internship/placement management module for posting, applying to, and tracking opportunities
- A dashboard providing placement/internship status tracking and basic analytics for institutions and industry partners

7. What is Current TR (Technology Readiness) Level

- ☐ Level 1 – Basic Principles Observed
- ☒ **Level 2 – Technology Concept Formulated**
- ☐ Level 3 – Experimental Proof of Concept
- ☐ Level 4 – Technology Validated in Lab
- ☐ Level 5 – Technology Validated in Relevant Environment
- ☐ Level 6 – Technology Demonstrated in Relevant Environment
- ☐ Level 7 – System Prototype Demonstration in Operational Environment
- ☐ Level 8 – System Complete and Qualified

☐ Level 9 – Actual System Proven in Operational Environment

8. Select the SDG Goal (Multiple SDG can be selected)

☐ No Poverty

☐ Affordable and Clean Energy

☐ Climate Action

☐ Zero Hunger

☒ **Decent Work and Economic Growth**

☐ Life Below Water

☐ Good Health and Well-being

☐ Industry, Innovation and Infrastructure

☐ Life on Land

☒ **Quality Education**

☐ Reduced Inequality

☐ Peace and Justice Strong Institutions

☐ Gender Equality

☐ Sustainable Cities and Communities

☒ **Partnerships to achieve the Goal**

☐ Clean Water and Sanitation

☐ Responsible Consumption and Production

9. Will the project/Dissertation continue in next semester?

☒ Yes ☐ No

10. Is the Project Interdisciplinary?

☒ Yes ☐ No
